DERON

ELECTRIC TRICKLE DUSTER

#1

Choice for Trouble Free Trickle Dusting

The Deron ETD2 Electric Trickle Duster is the mining industry's preferred machine for trouble-free trickle dusting. Approved by MSHA and PA, the Deron ETD2's 2 HP Permissible Motor direct coupled to a 3300 Series Blower eliminates any V-belt maintenance. The fully aerated rockdust chamber, the patented Venturi Pick-Up, plus the adjustable discharge rate, produces successful unattended trickle dusting.

A sliding hopper lid enables the operator to fill the 450 lb. hopper with quickness and ease. Built for excellence in performance, the Deron ETD2 Electric Trickle Duster is available as shown on three (3) solid rubber tires or skid mounted.

Features

- 2 HP Permissible Motor and Starter
- Direct Drive Chain Type Coupling Between Motor and Blower
- 450 lb. Hopper with Sliding Lid
- Removable Aeration Chamber
- Patented Venturi Pick-Up
- Adjustable Discharge Rate
- MSHA Approval No. 2G-3403A-O
- PA Approval No. BFE-888-83
- Three (3) Solid Rubber Tires

Specifications

- Operates on 460 or 575 Volts, A/C, 60 Hz, 3 Phase
- Dimensions: 28" high x 35" wide x 73" long (wheel mounted)
27" high x 37" wide x 62" long (skid mounted)
- Discharge Rate: 1/2-5 lb. per minute thru 1-1/2" hose
- 5" Ground Clearance (Wheel Mounted)
