DERON

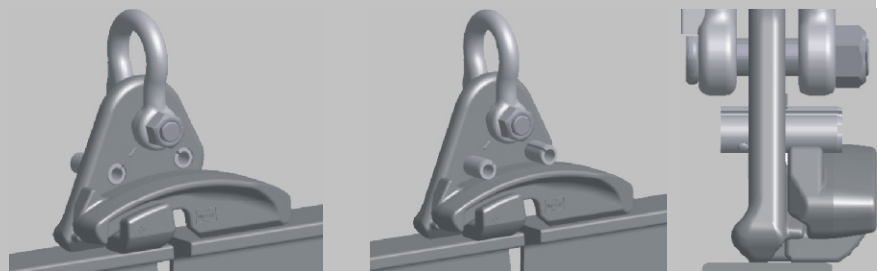

140E STEEL RAIL

Rails for Overhead Monorail Systems

Designation	I 140 E
Length	10 ft or 3 m
Weight	169 lb.
Material	Steel
Rated Load	6,000 lb.

Insert rail (lug end) into rail (T-piece end)

The pre-assembled split pins are punched through up to the tongue end. Important: The split pins must be punched through to the stop, the "dish". If a rail is installed again at a different location, the old split pins must be replaced by new ones.

Assembly Steps
